ROOM AUTOMATION

Room Automation is the Space Booking module that allows one to control all the room devices, recall scenarios, extend meetings or interrupt them, restoring the availability of rooms. The module is available from the same touch booking of the room, placed on the conference room table.

ABLE TO CONTROL:

- Inputs
- Outputs
- Videoconference
- Air Conditioning
- Lights
- Sounds
- Microphones
- LIM
- and much more

Easy Meeting is Cisco & Pexip ready

EASY MEETING

From the integration of the video conference world with that of Space Booking, comes Easy Meeting: a simple and effective system for organizing meetings and events with the engagement and setup of video conferencing systems, directly from the platform.

- Booking rooms [with Space Booking]
- Invite participants, even remotely
- Check-in in order to automatically activate the technology
- Activate the video conference automatically, if required

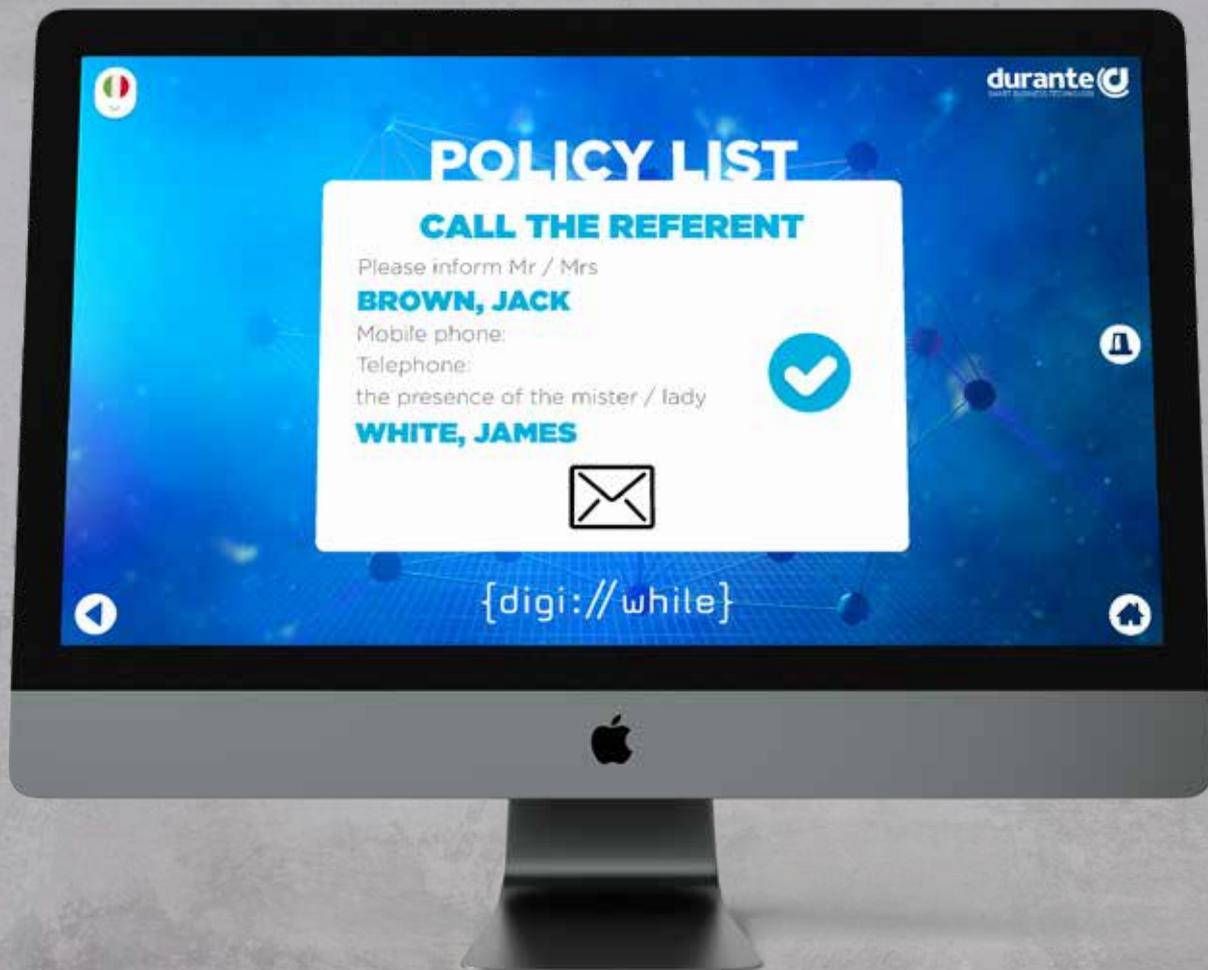

DESK BOOKING

With Space Booking 2020 we have introduced many new features for the personal resources including the desk booking that is built-in into the logic of the web portal, the Outlook plug-in, the Exchange and G-suite connectors and of course in both the Android and iOS Apps.

- Display booking information
- Interactive
- Check-in / Check-out features
- Power and Network cable free

EASY VISIT

The ideal solution for eliminating paper registries, simplifying the process of crediting, respecting the privacy of guests and to be GDPR compliant in the acquisition of personal data and in the provision of wi-fi guest credentials.

If integrated with Space Booking, any reservation done on the platform will be notified instantly to the receptionist, the guests and the rooms.

- Quickly credit guests
- Provide wi-fi credentials and travel documents
- GDPR compliant
- Locally print out the list of guests present
- Notify hosts
